w: [www.pixelmagic.co.ug](http://www.pixelmagic.co.ug)

## web development

We develop websites of all types and sizes, and customized to your needs. They can however be generally grouped into three categories:

Category	Estimated Cost*
<b>Personal</b>	
This kind of website is very basic in functionality, just displaying information and a few photos and your contacts on a few pages, usually not more than 5. It is recommended for personal websites or very small company websites.	500,000/=
<b>Business</b>	
For a bigger and more functional website, the business category fits the bill. It has more pages and information and is scalable in that it is easy to make it a bigger website should the need arise in the future. It may have up to 15 pages, a database, a Content Management System and custom banners on each web page.	1,500,000/=
<b>Professional</b>	
This is the crème-de-la-crème. It can have so many more pages, a number of databases, a Content Management System, site search, member sign up and members only content, feedback forms, a blog, guestbook and photo gallery. It is e-Commerce ready to enable you to set up an online business or simply accept payment online.	2,500,000/=

\* These are just estimates. We shall give you a more specific quote after we have discussed the project and determined your particular needs.

## email

Our Email services are available in four packages, **Bronze, Silver, Gold** and **Platinum** to allow you to order for only what you need. (you@yourcompany.com)
